

## Prompts – Vídeos Bíblicos

Prompt 1: I need five engaging, biblically accurate animated Bible stories for my YouTube channel. Each story should:

1. Stay True to Scripture – Ensure all details align with the Bible, using references from the Old or New Testament. Avoid adding fictional elements that change the core message.
2. Be Engaging for All Audiences – The stories should be compelling, easy to follow, and suitable for children and adults. Use simple, grade 6–8 level language to make them accessible.
3. Include a Clear Moral Lesson – Highlight the key lesson or spiritual principle in each story (e.g., faith, obedience, love, forgiveness).
4. Feature Strong Storytelling Elements –
  - o A clear beginning, middle, and end
  - o Engaging dialogue where appropriate
  - o Descriptive storytelling that paints a vivid picture
5. Be Suitable for Animation – The stories should translate well into animated videos, meaning they should include visual elements, action, and emotional depth.

Each story should be 1–3 minutes long when narrated. Please provide: • A title for each story • The Bible passage it's based on • A brief summary (3–5 sentences) The goal is to create high-quality, engaging Bible stories that educate and inspire my audience.

Prompt 2: Please write a short, engaging 1-3 minute video script that retells a Bible story in simple, relatable language. The script should be structured clearly into three sections:

1. Beginning – Introduce the main characters and setting. Provide enough context to make the audience understand the scene without overwhelming them.
2. Middle – Focus on the key events of the story. Highlight the actions and decisions of the characters that drive the story forward. Make sure the major events are easy to follow and build up to the climax of the story.
3. End – Conclude with a resolution to the story, emphasizing the moral lesson or message. The end should leave the audience with something to reflect on or apply to their own lives.

Additional Guidelines: • Keep the language simple and approachable, suitable for a wide audience, including those who may not be familiar with the Bible or its stories. • Focus on the central themes and moral lessons. • Ensure the tone is friendly, warm, and conversational, making the story feel welcoming and engaging. • The script should flow naturally, with clear transitions between the beginning, middle, and end. Use descriptive language to help the audience visualize the scenes without making it overly complicated. • Keep the narrative focused on the essential details of the story, avoiding unnecessary tangents or complex theological explanations. The goal is to make this Bible story accessible, memorable, and compelling for anyone watching, whether they're familiar with the text or hearing it for the first time.

Prompt 3: Okay, now I'm planning to create a story video using AI image generators and video generators for this script. My main goal is to maintain consistent character appearances throughout the video. Here's what I need your help with: Analyze the script we written and identify all characters: Write down every character in the story. Create character appearance descriptions for each character (Write it as a paragraph): For each character, write a short, simple description as a one paragraph that includes their appearance. In the paragraph description should cover: Character Age, Face and body color, Hairstyle and hair color, clothes, Clothing color and style, Shoes and any accessories. This chat will contain all the necessary details for the next steps, so make sure to keep everything in mind. Can you do this for me?

Prompt 4: Great! In the next steps, I will divide the story into individual scenes and send you one sentence for each scene. Here's what I need you to do for each scene: Analyze the scene: Read and understand the sentence I send from the script to get an idea of the characters and actions featured in that scene. List the characters: Write the names of all the characters appearing in that specific scene. Write a detailed image prompt: Create a suitable image prompt for that scene that includes: The character appearances we've already created (I will remind you of their descriptions, so make sure add them into image prompts to keep consistent character). The character facial expressions that match the mood or action in that scene. Specific details to achieve a 3D Animation Pixar-style look for the visuals, suitable for a kids' story. (In every image prompts lastly add this to keep consistent style in every image) Scene-specific elements like background settings or props as necessary. Use simple English to make the prompts easy to follow, and ensure the prompts are clear and detailed enough for generating consistent visuals. Write image prompts as one paragraph and make sure to include character details and 3D

Animation Pixar-style look. This chat includes all the necessary details for the process, so keep everything in mind moving forward. Are you ready to help me achieve this?

Prompt 5: Okay, great! Now I want to animate the images I've created. The animations need to look realistic and closely related to the script scene. I'll be using Hailuo AI to animate them using the image-to-video feature. Here's what I need from you: Analyze the scene: Read the scene details I provide and understand the actions, emotions, and overall flow of the scene. Create the animation description: Write a clear and short animation description that I can paste directly into Hailuo AI's text box. The description should include: Cinematic character actions: Describe what the characters in the scene are doing, their facial expressions, and body movements. Camera angles and movements: Specify dynamic cinematic angles and movements, such as close-ups, panning, zooming, tracking shots, or any other to make it feel like a movie. Background animation: Include how the background elements should behave and how they interact with the characters. Keep it story-specific: Ensure the animation stays consistent with the story and enhances the mood of each scene. Use simple grade 10 English: Write the animation description in straightforward and simple English so it's easy to understand and input into Hailuo AI. I will provide the scene details one by one, along with the image prompts. Write them as one short paragraph including all the details I mentioned to get cinematic look. Let me know if you're ready, and we can start!

Instruções:

- 1 – Criar o roteiro com os prompts 1 e 2
- 2 – Copiar o roteiro para um local separado
- 3 – Com o prompt 3, criar a consistências dos personagens
- 4 – Copie a descrição dos personagens em um local separado
- 5 – Utilizar o prompt 4 e depois usar todas as cenas, uma por uma, para gerar um prompt detalhado para cada uma das cenas. Quando tiver personagens, colar a descrição deles junto
- 6 – Leonardo.ai para criar as imagens das cenas, depois de criar todos os prompts. Selecionar modelo Phoenix 0.9 e estilo dinâmico.

7 – Abra uma nova conversa, cole o prompt 5. Depois use a análise da cena e o prompt da imagem para gerar a descrição das animações.

8 – Para animar as imagens, use [hailuoai.video](https://hailuoai.video).

9 – Criar a narração no elevenlabs, copiando o roteiro e colando

10 – Editar o vídeo juntando tudo
